# How is supply chain instability affecting industrial production?

Getting Started · https://cbotai.shahrear.msf.bd/docs/how-is-supply-chain-instability-affecting-industrial-production/

**Industrial production in Bangladesh is coming under added pressure as instability in global supply chains disrupts the availability of key raw materials, raising concerns over possible production slowdowns in the coming weeks.**

Industry stakeholders report that price hikes are being compounded by acute instability in global supply chains and order processing.

Kamruzzaman Kamal, marketing director of PRAN-RFL Group, said, "We are facing A shortage of plastic raw materials and are currently sustaining our operations solely on existing pipeline stocks."
