Releasery – WordPress Plugin Overview

Setup Process · https://cbotai.shahrear.msf.bd/docs/releasery-wordpress-plugin-overview/

Summary

The visual shows A WordPress plugin named Releasery with the tagline “Your changelog page updates itself.” It highlights automation for publishing release notes from GitHub to A WordPress changelog page and emphasizes that it is “NEW — WordPress Plugin.”

Key Screens

Release Card

- A panel titled “EPFolio release.”
- Version 1.5.0 with A green badge labeled “Latest.”
- Entry text: “Added — Built-in MCP server.”
- A large button labeled “Published.”

Changelog Page Example

- Header path example: “yoursite.com/changelog.”
- Section title: “Changelog — EPFolio — Explorer Portfolio Kit.”
- Entry for version 1.5.0 with:
  - Date: “September 29, 2026.”
  - Badge: “NEW.”
  - Change item with A green “Added” tag: “Built-in MCP server.”
- Previous entry 1.3.0 with:
  - Date: “September 29, 2026.”

    - Gray “Fixed” tag: “Header menu after switching themes.”

What Makes It Different

- **GitHub Releases** — “Exact release dates. Unreleased work never shows early.”
- **Private repos** — “Read-only token, stored encrypted. Never shown again.”
- **Updates instantly** — “A GitHub webhook refreshes the page the moment you ship.”
- **Review first** — “Drafts and ‘Keep my edits’. Trashed entries never return.”
- **Knows your pages** — “Finds the block, shortcode or Elementor page. One-click create.”
- **~50 KB light** — “No build step. CSS loads only where A changelog shows.”

Call to Action

- A button-style banner: “Free on WordPress.org.”
- Link text shown: “wordpress.org/plugins/releasery.”

Branding

- Plugin name: “Releasery.”
- Logo: stylized “R” mark displayed next to the name.
